# DustScan

Dust Monitoring and Dust Consultancy Services

## Price List - March 2010

### Further Analysis and Reporting

Inferred directional / settled dust mass report	£22.50
AAC or EAC site dust detection plot, per batch ( <i>Requires site drawing in .dxf or .dwg format. Subject to initial set-up fee of £75.00</i> )	£25.00
Brief summary directional, PM <sub>10</sub> , dust mass or optical microscopy report	£100.00
Site monitoring summary report - monthly, quarterly or annual directional dust and/or PM <sub>10</sub> or dust mass data for up to 5 gauges ( <i>Additional interpretation at Consultancy Rates</i> )	£250.00

### Geochemical Analysis

We carry out detailed chemical analyses of dust and materials samples. In conjunction with academic and industry partners we have developed new methods for laboratory analyses of directional dust samples. Reports can be issued simply as tabulated data from specific analyses or as part of a comprehensive consultancy report. POA

Please contact us to discuss your specific requirements. Laboratory and reporting fees vary according to application.

### Consultancy Services

**DustScan Ltd** is an independent consultancy specialising in dust monitoring, prediction and control, in relation to general industrial activities. We combine an engineering background with environmental science and routinely provide Baseline Studies, Environmental Impact Assessments and Expert Opinions. Consultancy rates £50.00 - £100.00 per hour.

**Prices are in GBP and exclude VAT**
