DustScan

Dust Monitoring and Dust Assessment

CONSULTANCY SERVICES

DustScan Ltd is an independent consultancy specialising in dust monitoring, prediction and control, in relation to general industrial activities. We operate for the extractive, waste management and redevelopment sectors, manufacturing industry and utilities. We combine an engineering background with environmental science and routinely provide:

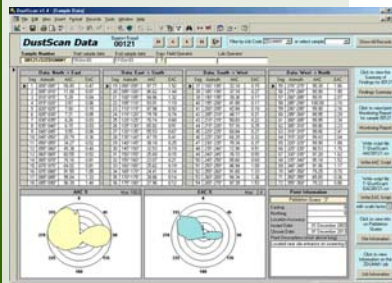

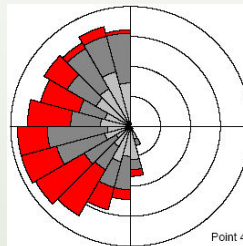

- Baseline Studies
- Environmental Impact Assessments
- Expert Opinions

Consultancy Rates £50 - £90 per hour + VAT

DATA MANAGEMENT SERVICES

We carry out a wide range of site-specific dust management and reporting services, including:

- Summary reporting
- Site data management
- Spatial dust evaluation
- Dust source appraisals
- Assessment of weather constraints on dust propagation

Above: Cumulative directional dust data at 3 thresholds

Left: DustScan dust management database

GEOCHEMICAL ANALYTICAL SERVICES

We carry out detailed chemical analyses of dust and materials samples. In conjunction with academic and industry partners we have developed new methods for laboratory analyses of directional dust samples. Reports can be issued simply as tabulated data from specific analyses or as part of a comprehensive consultancy report.

Please contact us to discuss your specific requirements. Laboratory and reporting fees vary according to application.
